

ABOUT THE BOOK HTML, XHTML, CSS and XML by example explains how to manually create web pages using HTML, XHTML, CSS, and XML technologies. This book is based on W3 Consortium specifications and details how the most commonly used browsers implement these recommendations. Designed as a useful reference and guide, this book provides complete code sources, high-resolution screen captures and more than 300 descriptive examples to aid the developer. Each feature of HTML, XHTML, CSS, and XML is presented, analyzed and exemplified by emphasizing the purpose for which that feature was designed and implemented. As well, the full range of possible attribute and property values is detailed with complete examples. This book also presents detailed solutions explaining how the developer can integrate HTML, XHTML, CSS, and XML to create professional web pages using these complementary Internet technologies.
