

Languages, Compilers, and Tools for Embedded Systems: ACM SIGPLAN Workshop LCTES 98, Montreal, Canada, June 19-20, 1998, Proceedings (Lecture Notes in Computer Science)

This book constitutes the strictly refereed post-workshop proceedings of the ACM SIGPLAN Workshop on Languages, Compilers, and Tools for Embedded Systems, LCTES 98, held in Montreal, Canada, in June 1998. The 19 revised papers presented were carefully reviewed and selected from a total of 54 submissions for inclusion in the book; also included are one full paper and an abstract of an invited contribution. The papers address all current aspects of research and development in the rapidly growing area of embedded systems and real-time computing.

Embedded control systems development with Giotto. In. Proc. ACM SIGPLAN Workshop on Languages, Compilers, and Tools for Embedded Systems (LCTES). This paper describes the tool support for a framework for performing probabilistic worst-case execution time (WCET) analysis for embedded real-time systems. (LCTES98), Montreal Canada, June 19-20 1998. [7] Y. A. Liu and G. Proceedings of the ACM SIGPLAN Workshop on Languages, Compilers and Tools for Embedded Systems until 1998
