

Eyewitness Reliability in Motor Vehicle Crashes: A Primer for Practitioners, Second Edition

A necessity for anyone involved with eyewitness reports. How often have you worked on an accident investigation and found that eyewitness testimony contradicts the physical evidence found on the scene? What do you do when you have a witness stating that he saw the driver of a white truck passing him at 80 miles per hour, but the physical evidence suggests that the driver was traveling at 50 miles per hour? How can an eyewitness remember seeing a barn on the scene, when in fact there was no barn? Dr. Robins explains this and much more. Investigators, police officers, insurance adjusters, judges, plaintiffs attorneys and defense attorneys alike should own this book. It explores, in laymans terms, the fallible aspects of eyewitness testimony. Discover how two witnesses can contradict each other over the same accident scene. Learn how witnesses acquire postevent misinformation. Find out the crucial role that human memory plays. Discover the way juries often evaluate witness testimony on the basis of witness confidence and personality. Dr. Robins engages you throughout this book by citing case studies, research, and seminar demonstrations that both interest and educate you. If you are an investigator, you will learn what kind of questions to ask your witnesses to get the most information from them. As a defense attorney, you will learn where to undermine the eyewitness testimony against you. As the plaintiffs attorney, you will understand how to avoid the pitfalls of eyewitness evidence. Dr. Robins raises issues you cannot afford to ignore. By learning from one of the worlds experts, you can make eyewitness testimony an asset to your case! Topics covered:
Physical evidence versus human evidence
Aspects of the human eye and vision
Introduction of misinformation
Aspects of memory as storage
Aspects of memory in perception
Confidence levels of witnesses
