

Programming and Research: Skills and Techniques for Interior Designers provides a step-by-step approach to mastering the process of documenting client and user requirements for any design project. Replete with examples and analyses of student and professional work, this book guides its readers through the creation of their own program documents. Both the National Council for Interior Design Qualification and the Council for Interior Design Accreditation consider programming a required core of knowledge. Programming and Research focuses on how the study of programming for interior designers prepares students for and advances them into the professional realm.
