A new edition of Continuum's best selling book revised and amended to address all the issues of the forthcoming Referendum and the publication of the new EU Constitution. It told the true story of the origins and history of the European Union—revealing all the deception and skulduggery involved. Now with the publication of the new European Constitution, Christopher Booker and Richard North have condensed some of the early history in order to make space for an examination of the new European Constitution and to argue that in it are all the tricks and traps at the heart of this European Idea and the disastrous consequences.
